**17:45 - 18:00**

### SHORT COURSE DESCRIPTION:

Course participants will learn the basic principles of using lasers in a variety of non-surgical procedures within the field of minimally invasive gynecology.

The entire course consists of four topics covering the use of SMOOTH Erbium laser systems in indications of: Vaginal Relaxation Syndrome (VRS), Genitourinary Syndrome of Menopause (GSM), Stress Urinary Incontinence (SUI) and Pelvic Organ Prolapses (POP). The final lecture will be dedicated to future uses of lasers in gynecology. Each lecture will last 30 minutes and will have 10 minutes for discussion. Upon completing the End-of-Course Test, participants will receive the Course Certificate.
