Dr. Irena Hreljac, Dr. Neza Koron, Zdenko Vizintin)
12. End-of-Course Test
16:30-16:45

SHORT COURSE DESCRIPTION:

Course participants will learn the basic principles of using lasers for a variety of minimally invasive non-surgical and surgical gynecology procedures.

The course program consists of twelve topics divided into three parts: Part I covers the use of FotonaSmooth® Erbium laser systems in pelvic floor dysfunction indications and aesthetic gynecology. Part II is composed of short presentations of innovative new applications like the treatment of vulvar lesions and vaginal & urinary infections, while Part III is dedicated to a Q&A session and end-of-course exam.

Upon completing the end-of-course exam, participants will receive a Course Certificate.
