Short Course Description:

Course participants will learn the basic principles of using lasers and magnetic stimulation in a variety of non-surgical and surgical procedures within the field of minimally invasive gynecology.

The entire course consists of eleven topics divided into four parts. In Part I the use of Fotona SMOOTH® Erbium laser and magnetic stimulation for female urinary incontinence will be discussed. The second part is dedicated to laser in menopause, while Part III will present additional new innovative applications as well as a range of possible laser treatments. In the last part (IV) participants will complete an End-of-Course Test.

Upon completing the End-of-Course Test, participants will receive the Course Certificate.
